

Excessive Sweating (Hyperhidrosis)

Feel better and less self-conscious about bothersome sweating. Excessive underarm sweating can now be treated in a variety of ways. We offer the two most effective methods to treat this condition.

Botulinum Toxin can be used to target the axillary glands under the arms which stops sweating by preventing nerve impulses to those glands responsible for perspiration.

Genius-RF combines the benefits of microneedling with radiofrequency energy to treat Hyperhidrosis to reduce sweating by up to 85%.

- Target sweat glands under the arms
- Minimally invasive
- Low discomfort
- Minimal downtime
- Effective treatment with high patient satisfaction
- Sweat reduction is permanent with Genius-RF
